

Job Description – Software Developer

Software Developer (Full-time position in Westfield, MA)

About the job

Myers Information Systems, Inc. is looking for a software developer to join our expanding engineering team and contribute to our line of software applications for the media distribution and broadcast industry. This includes designing, implementing, testing, documenting, and maintaining products we build on object oriented and procedural language platforms.

We are a small team of engineers committed to building dependable and scalable solutions that support our client's continuously expanding businesses. We are looking for self-motivated individuals that love to challenge themselves and thrive on continuously improving everything they encounter. Our team is built on sharing knowledge, empowering one another and building awesome products together. Our office is a fast-paced, risk-taking, goal driven, family-oriented environment and we're seeking like-minded individuals to join the team.

About the day-to-day

- Design and develop maintainable, reliable, scalable and testable enterprise level software & services
- Collaborate within a small functional team with diverse technology backgrounds
- Assist product in conceptualizing and implementing new software features and functionality for our existing software solutions
- Deploy regular code releases to production and test environments
- Work with technical support, vendors and clients to identify day-to-day problems and solutions
- Assist in the preparation and documentation of software requirements and specifications

About your skills

- College degree in the field of computer science, and/or 1+ years equivalent work experience.
- Development experience with object oriented and/or procedural programming language in a production environment
- Hands on experience working in an integrated development environment
- Experience with Unix/Linux operating systems
- Solid understanding of SQL and relational databases
- Working knowledge of current internet technologies such as XML and web services
- Experience and/or familiarity with platforms like GWT, Javascript, FourJ's and/or C#
- Experience with CI, Maven, Tomcat, Sencha and/or J Unit a plus
- Familiarity with the media/broadcast industry is preferred

More about us

- Salary: DOE; Competitive, with Full benefits - including medical and 401k
- Successful candidate is expected to work on-location. Relocation support will be considered.
- Principals only. Recruiters please don't contact this job poster.
- Please, no phone calls about this job or solicitations for other services, products or commercial interests.
