

Job Description – QA Team Lead

Full-time position

Myers Information Systems, Inc. is looking for a Quality Assurance (QA) Team Lead to join our expanding software development team and contribute to our line of software applications for the media distribution and broadcast industry. This includes testing, documentation, requirements clarification, test plans, release notes and testing automation.

We are a small team of engineers committed to building dependable and scalable solutions that support our client's continuously evolving businesses. We are looking for self-motivated individuals that love to challenge themselves and thrive on continuously improving everything they encounter. Our team is built on sharing knowledge, empowering one another and building awesome products together. Our office is a fast-paced, goal driven, family-oriented environment and we're seeking like-minded individuals to join the team.

Responsibilities include:

- Lead a small team of QA analysts
- Design and implement test plans for all Myers products
- Design and implement testing automation to increase code coverage and decrease our time to release
- Lead the adoption of best practices, methodologies, and tooling to advance quality releases
- Collaborate within a small functional team with diverse technology backgrounds
- Monitor efforts to resolve product issues and track progress
- Ensure the final product satisfies the product requirements and meets end-user expectations
- Other duties as assigned

What we're looking for:

- Management experience leading a team
- 2+ years of relevant QA/testing automation experience
- Strong Communication and documentation skills
- Experience working on an Agile Scrum team
- Experience with MABL or other mainstream testing automation tools

Additional skills that would be helpful to this position:

- Experience with Broadcasting (TV and/or radio), scheduling and/or broadcasting industry
- Experience with Zendesk, Jira and associated plugins and integrations
- Experience with Unix/Linux operating systems
- Understanding of SQL and relational databases

About Myers
